

# Workshop 1

## Process safety leadership

- Common appreciation of the issues but people feel uncomfortable and frustrated.
- KPIs provide a “glue” to bind understanding and performance excellence.
- Find a way to share good practice.

## Workshop 2

# Leading and learning – building on experiences on peer review

- Strong support for a robust, real but practicable peer review process within and across MH sectors in the UK.
- Leaders' commitment to learn from each others' organisations.
- Cross MH forum should be established to provide leadership.

## Workshop 3

# Leadership and the STEPCHANGE initiative in the offshore industry

- Improved learning and working together between companies at regional and sector level, and between sectors.
- Ensure effective support for such initiatives
- Common approaches to behaviours and expectations across industry.
- Develop visibility of the senior leadership team on health and safety.

## Workshop 4

### Equipping independent directors for their task in major hazards organisation

- Opportunity to develop knowledge of major hazards for senior people, within and across industries.
- Routes for top management to hear it how it is (corporate unease).
- Need to follow through on actions, many of the issues are around behaviours.
